DETAILED ACTION

Claims 1-34 are pending in this application.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-5 and 33-34, drawn to compounds of formula I or Ia and corresponding composition, classified in class 544/546/548, various subclasses depending on the Het ring.
- II. Claim 6, drawn to a process of preparation of compound of formula I or Ia, classified in various class/subclasses.
- III. Claims 7-8, drawn to another process of preparation of compound of formula I or

 Ia, classified in various class/subclasses.
- IV. Claim 9-11, drawn to another process of preparation of compound of formula I orIa, classified in various class/subclasses.
- V. Claim 12, drawn to another process of preparation of compound of formula I or Ia, classified in various class/subclasses.
- VI. Claims 13-15, drawn to another process of preparation of compound of formula I or Ia, classified in various class/subclasses.
- VII. Claim 16, drawn to another process of preparation of compound of formula I or Ia, classified in various class/subclasses.

Application/Control Number: 10/020,241

Art Unit: 1624

- VIII. Claims 17-20, drawn to a method of use of compound of formula I or Ia, classified in various class 514 and various subclasses.
- IX. Claims 21-24, drawn to another method of use of compound of formula I or Ia, classified in various class 514 and various subclasses.
- X. Claims 25-27, drawn to another method of use of compound of formula I or Ia, classified in various class 514 and various subclasses.
- XI. Claims 28-29, drawn to another method of use of compound of formula I or Ia, classified in various class 514 and various subclasses.
- XII. Claim 30, drawn to another method of use of compound of formula I or Ia, classified in various class 514 and various subclasses.
- XIII. Claim 31, drawn to another method of use of compound of formula I or Ia, classified in various class 514 and various subclasses.
- XIV. Claim 32, drawn to another method of use of compound of formula I or Ia, classified in various class 514 and various subclasses.

The inventions are distinct, each from the other because of the following reasons:

Inventions II-VII and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the

Application/Control Number: 10/020,241

Art Unit: 1624

instant case the product as claimed can be made by different processes using materially different intermediates and/or reagents.

Inventions I and VIII-XIV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP—§ 806.05(h)). In the instant case the different processes of use can be practiced by other known therapeutic agents. Also, the product can be used in different processes involving different functions and/or effects.

Inventions II-VII and VIII-XIV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the inventions have different modes of operation, i.e., some are drawn to synthetic processes and the others are therapeutic methods.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Claims 1-34 are generic to a plurality of disclosed patentably distinct species comprising the species embraced by the generic structural formulae. In addition to election of a single group

Application/Control Number: 10/020,241

Art Unit: 1624

from above, applicant is required under 35 U.S.C. 121 to elect a single disclosed species that falls within the elected group, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission—may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deepak Rao whose telephone number is (703) 305-1879. The examiner can normally be reached on Tuesday-Friday from 6:30am to 5:00pm.

Art Unit: 1624

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Mukund Shah, can be reached on (703) 308-4716. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
